

# HSA HOME WARRANTY'S WARRANTY MINUTE

---

## ARE YOUR CLIENTS' HEATING SYSTEMS READY FOR WINTER?

With cooler weather just around the corner, it's a great time to ensure your clients' heating systems are functioning properly. To help, we have partnered with ProConnect® to perform pre-season heating system tune-ups.

Until November 15, 2022, ProConnect® is offering heating system tune-ups for **\$75 per unit** (plus any applicable sales tax) for HSA members.

**Your clients can schedule a heating tune-up, along with many other discounted home maintenance services, by logging into the new Special Offers tab in MyAccount.**

**To learn more, contact an HSA team member today.**

\*For a limited time, a ProConnect Home Solutions, Inc. independent service contractor ("Pro") will perform a pre-season HVAC system tune-up on one unit for \$75 per unit (plus any applicable sales tax). An additional \$75 fee (plus any applicable sales tax) applies for each additional unit serviced. The fee for tune-ups must be paid at the time of the service request. For eligible customers, the \$75 fee may be waived on the first unit. Service dates are limited and may vary based upon location, Pro availability and weather. For AC systems, daytime outside air temperature must be 65 degrees Fahrenheit or above to perform a tune-up. HVAC tune-up services are not available in all locations. If the Pro finds a problem that is covered by your home warranty agreement, a Trade Call Fee will be due at the time of the service request. The warranty holder is responsible for any cost associated with any problems not subject to coverage under the home warranty agreement. Tune-up is a maintenance service and provides no guarantee against system breakdowns or failures. AC systems are not eligible for the tune-up during the fall heating tune-up season. Heating systems are not eligible for the tune-up during the spring HVAC tune-up season. HVAC units must be safely accessible to the Pro. The pre-season HVAC tune-up is not included in Seller Coverage and is for buyer use only. Not available in Alaska.
